(scikitlearn, pytorch)  
Version Control via Git  
Data Literacy  
SQL familiarity via Relational and  
Spatial Databases  
Mapping Software Fluency (ESRI  
products, QGIS)  
Strong collaboration skills and  
individual work ethic  
Finds and (re)learns information  
efficiently  
Makes the most of less-than-ideal  
situations

## EXPERIENCE

**CB2 (University Village), Seattle, WA**  
*Stock Associate*

May 2021 - August 2021

Processed online orders in the APP400 system, handling approximately 100+ orders per week. Prepped items for both in-store pick-up and shipment, implementing optimal packaging preparation methods for each item. Assisted customers' phone calls and Gladly texts in retrieving their orders, handling approximately 50+ inquiries per week

**UW Housing & Food Services, Seattle, WA**  
*Mailroom Clerk*

September 2019 - June 2020

Processed letter and package mail via the package database system, handling an incoming volume of approximately 100 pieces of letter mail and 200 packages per week. Assisted customers in retrieving packages and troubleshooting concerns, personally answering approximately 15 calls and 40 in-person requests per week.

**UW Housing & Food Services, Seattle, WA**  
*Resident Advisor*

June 2018 - June 2020

Served as the primary point of contact for approximately 50 residents living within the housing community, ensuring an enjoyable living experience. Encouraged healthy and meaningful relationships between roommates and other residents, serving as a mediator in times of interpersonal stress. Created engaging visual displays on the walls of the community in order to foster a more relaxing living environment, as well as to provide informational updates as necessary for the residents. Coordinated social events on a bi-weekly basis, leading to increased resident engagement and greater social interaction between residents. Facilitated quarterly meetings for residents of the community, effectively communicating information and actionable items to at least 50 residents at a time.
